# ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS

Founded by C. TRUESDELL, 1958

Editors: C TRUESDELL 1958–1990, J. SERRIN 1967–1985

---

*Mechanicam vero duplarem Veteres constituerunt: Rationalem quae per Demonstrationes accurate procedit, & Practicam. Ad practicam spectant Artes omnes Manuales, a quibus utique Mechanica nomen mutuata est. Cum autem Artifices parum accurate operari soleant, fit ut Mechanica omnis a Geometria ita distinguitur, ut quicquid accuratum sit ad Geometriam referatur, quicquid minus accuratum ad Mechanicam. Attamen errores non sunt Artis sed Artificum. Qui minus accurate operatur, imperfectior est Mechanicus, & si quis accuratissime operari posset, hic foret Mechanicus omnium perfectissimus.*

NEWTON

*La généralité que j'embrasse, au lieu d'éblouir nos lumières, nous découvrira plutôt les véritables loix de la Nature dans tout leur éclat, & on y trouvera des raisons encore plus fortes, d'en admirer la beauté & la simplicité.*

EULER

*. . . ut proinde his paucis consideratis tota heac materia redacta sit ad puram Geometriam, quod in physicis & mechanicis unice desideratum.*

The ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS nourishes the discipline of mechanics as a deductive, mathematical science in the classical tradition and promotes pure analysis, particularly in contexts of application. Its purpose is to give rapid and full publication to researches of exceptional moment, depth, and permanence.

Each memoir must meet a standard of rigor set by the best work in its field. Contributions must consist largely of original research. Manuscripts intended for the Archive should be submitted directly to a member of the Editorial Board, who should acknowledge its receipt. Simultaneously, a copy of the manuscript and a copy of the cover letter should be sent to the editor, S. S. Antman, Department of Mathematics, University of Maryland, College Park, Maryland 20742, USA. Each page of the manuscript should be clearly printed on only one side with double spacing and with wide margins.

English, French, German, and Italian are the languages of the Archive. Authors should write clearly, correctly, and gracefully, following the rules and counsels set forth in good manuals of literary style, such as Sir Ernest Gowers' *The Complete Plain Words*, especially Chapters 6–9. The Editor cannot undertake to rewrite papers and therefore will return such manuscripts as he finds deficient in presentation.
